Description

- For balancing of rims without center hole or rims with a decentralised center hole
- Equipement for the future because of an increase of rims with decentralised center hole
- Location bolts continuously adjustable enable the adaption of different rims with 10, 8, 6 or 5, 4, 3 hole adaptors
- Highest degree of accuracy because of our milled and grinded components
- Among others in scope of delivery: hole circle gauge as well as wheel nuts with a conical adaptor and ball adaptor
- Perfectly functionable with our wheel balancers ATH W82, ATH W62, ATH W42, ATH W22
