Description

- Electro-hydraulic mobile column lift with cable control
- Operating unit on every column for flexible use
- Control system provides all operating information on every column and allows expansion up to 6 columns
- Mobile kit and forklift pockets on the columns enable quicker repositioning
- Safety Control: Hydraulic check valve, electronic synchronisation monitoring, and electromagnetic safety latches
- Safety Lock: Control for lowering the load onto the safety latches
- Multi-functional pick-up via variable wheel fork with individual adjustment options

Additional Information

| | |
|-----------------------|-------------------------------|
| Rated load capacity | 4.000 kg |
| Lifting height max. | 1.850 mm |
| Overall height | 2.570 mm |
| Column width | 1.100 mm |
| Driving power | 2,6 kW |
| Lifting/Lowering time | ca. 55 s |
| Power supply voltage | 3x 400V / C16A |
| Column communication | cable-connected |
| Concrete strength | min. C20/25 Thickness: 200 mm |
