Extensions for drive-on ramp ATH Four Lift 55/65 (set)

Product Images

Description

The ramp extension for the ATH Four Lift 55 and ATH Four Lift 65 has been specially developed to make it easier for vehicles with low ground clearance to drive onto the lift

The additional ramp length significantly reduces the approach angle, allowing vehicles with long overhangs to drive onto the lift more comfortably and safely

The robust construction can be fitted to the existing drive-on ramp, thereby extending the range of applications of the lift
