

Motorcycle mounting head plastic (adapter Ø 28.25mm)

Product Images

Description

The plastic mounting head with a fitting diameter of 28.25 mm is the specialised solution for demanding tyre service on motorcycles. Specifically developed for handling highly sensitive light-alloy rims and finished surfaces, the construction from resilient special plastic completely eliminates the risk of contact scratches and damage to the rim flange.

The geometry of the mounting head is precisely designed for the wheel contours and tyre sidewalls of modern motorcycle wheels to ensure tyre-gentle and effort-saving fitting and removal of the tyres. Thanks to the precisely engineered mount, the tool can be effortlessly fitted to compatible tyre changers, expanding the workshop portfolio with an indispensable quality standard in the premium two-wheeler segment.
