

ATH Supreme Lift® 2.35

Product Images

Description

Modern design meets future-oriented technology

The electromechanical 2-post lift impresses with space-saving triangular columns, a powerful spindle drive and maximum installation flexibility. Two fully independent columns communicate wirelessly via industrial radio – without any obstructive cross connection.

The ATH Supreme concept with ATH HeartBeat® control, patented double travel-distance measurement and the multi-stage ATH Supreme Safety System ensures precise synchronization, maximum operational safety and exceptional durability.

Operation and energy set on both columns, as well as flexible lifting arms with double-telescopic support pads, enable comfortable working. The fully covered components and high-quality design also make the lift a visual upgrade for every modern workshop.

Additional Information

Rated load capacity	3500 kg
Lifting height max.	2000 mm
Drive-through width	2333 mm
Overall height	3220 mm
Lifting/Lowering time	42 42 s
Power supply voltage	3x 400V / C16A
Concrete strength	C 25/30 4000 x 2000 x 200 mm
Color	RAL 7016
