

ATH RG5.5-4

Product Images

Description

- High-precision manufacturing by laser cutting and robotic welding
- Robust and less sensitive hydraulic drive, almost maintenance-free
- 4 mobile columns can be flexibly positioned due to long connecting cables
- With the hand hydraulic jack-lift, the columns can be moved in an easy and secure way
- Control unit on every column, lifting and lowering with push button control
- The control can be switched from one to all-column lifting
- Lifting mechanism with wear-free trapezoidal screw drive, self-locking bronze lifting nut and low-maintenance geared motor
- Safety nut if the support nut breaks
- Powder-coated lift in attractive anthracite gray
- Optional: Adapter for smaller wheels (item number: 710020)
- Optional: Mobil support frame (item number: 710050)
- Perfect lift for trucks and busses

Additional Information

Color	Anthrazitgrau / Schwarz
Rated load capacity	5,5 t
Lifting height max.	1.760 mm
Overall height	2.740 mm
Column width	1.120 mm
Driving power	3 kW
Lifting/Lowering time	ca. 180 s
Power supply voltage	3x 400V / C32A
Concrete strength	min. C20/25 Dicke: 250 mm
